

The Agency for Clinical Innovation

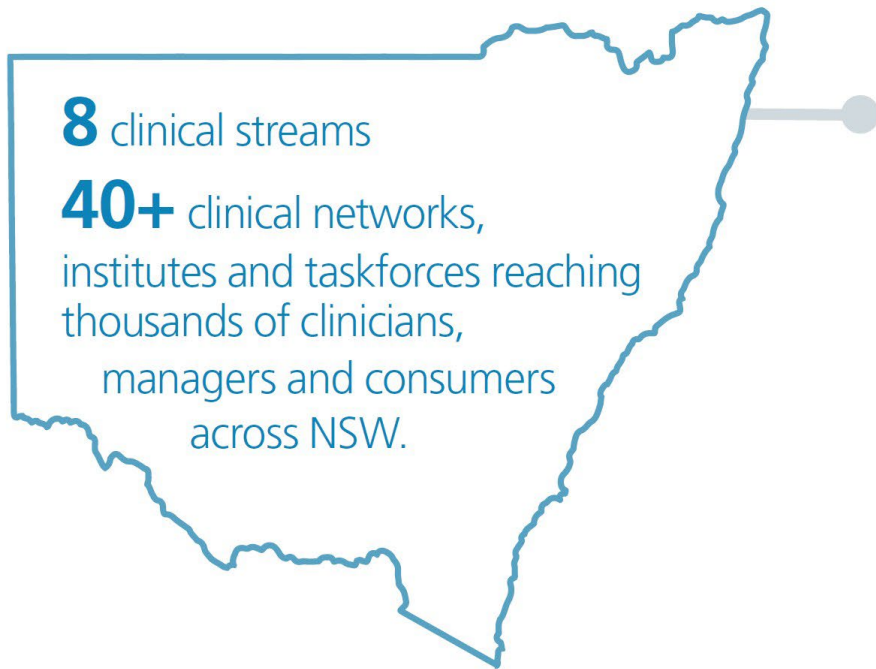

Presentation for the OHMR TRGS 2024 workshop

How to approach & partner with the NSW ACI

AGENCY FOR
**CLINICAL
INNOVATION**

Our core functions

Our core functions:

- Clinical guidelines and models of care
- Patient engagement and co-design
- Clinical evidence generation and mobilisation
- Clinical innovation and research
- Clinical redesign
- Implementation support
- Evaluation and capability development.

Our priority challenges (Strategic Plan 2023-2026)

- Integrating care for patients at the interface of hospital, primary, community and social care services
- Reducing unwarranted clinical variation and promoting high-value care
- Redesigning healthcare to facilitate the adoption of new health technologies, including new therapies and clinical processes
- Implementing virtual care and digitally-enabled models of care
- Supporting equity in access and outcomes of care
- Delivering person-centred and culturally appropriate care
- Fostering sustainability in healthcare.

Our structure – the 2 key directorates

CATALYST (Care Across the Lifecycle and Society) directorate:

- Aims to improve healthcare for patients throughout their lives and living environments.
- 5 streams: Aboriginal Health and Wellbeing; Chronic and Long Term Care; Chronic and Long Term Care; Integrated Care.

PRISM (Preserving and Restoring Interventions in Surgery and Medicine) directorate:

- Aims to positively impact the patients' journeys and trajectories. These networks expand the perspective and focus on care that is person-centred; looking after the entire person throughout, and beyond their hospital journey.
- 3 streams: Surgery, Anaesthesia and Precision Medicine; Trauma, Pain and Rehabilitation; Intensive and Urgent Care.

Clinical Networks & Institutes

Aboriginal Chronic Conditions Network

Aged Health Network

Anaesthesia Perioperative Care Network

Blood & Marrow Transplant + Cellular Therapies Network

Brain Injury Rehabilitation Network

Burn Injury Network

Cardiac Network

Chronic Care for Aboriginal People Program

Clinical Genetics Network

Diabetes & Endocrine Network

Drug & Alcohol Network

Emergency Care Institute

End of Life & Palliative Care Network

Frailty Taskforce

Gastroenterology Network

Gynaecological Oncology Network

Intellectual Disability Network

Institute of Trauma & Injury Management

Intensive Care NSW

Maternity & Neonatal Network

Medical Imaging Network

Menopause Taskforce

Mental Health Network

Musculoskeletal Network

Nutrition Network

Ophthalmology Network

Paediatric Network

Pain Management Network

Primary Integrated and Community Health

Rehabilitation Network

Renal Network

Respiratory Network

Rural Health Network

Spinal Cord Injury Service

Stroke Network

Surgical Care Network

Transition Care Network

Urology Network

Violence Abuse & Neglect Network

Virtual Care Network

Partnership roles

- Project advisory roles (e.g. project advisory committee).
- Connecting with clinicians, healthcare staff, & other parts of NSW Health.
- Assisting with developing project materials.
- Data.
- Implementation & dissemination plans.
- Other contributions as per ACI Networks expertise.

More information

- Visit our website for details about the ACI Networks, Taskforces, & Institutes: <https://www.aci.health.nsw.gov.au/networks> & contact the relevant Network Managers.
- For general research enquiries, please see <https://aci.health.nsw.gov.au/make-it-happen/research> or contact aci-research@health.nsw.gov.au.
- Proposals requesting partnerships from multiple agencies will be coordinated for review with those other agencies. Please approach all agencies as soon as possible.
